Backend
Node.js, Python, REST APIs, Auth.js, Prisma

Data & Infra
PostgreSQL, Redis, AWS (SES/SQS), Docker, Vercel

Practices
System Design, Data Modeling, AI/LLM Integration, Git, CI/CD

PROFILE

I'm an AI Automation Engineer at Bright Technology Ventures, where I design and build AI-driven automation systems across multiple business units. I combine full stack development with AI and workflow automation to streamline operations and create intelligent tools. Before that, I built web platforms and internal tools as a Full Stack Developer at the same company. I also worked four years as a Communication Specialist at a real estate management company, which taught me to think about the business side too, not just the code.

EXPERIENCE

AI Automation Engineer — Mar 2025 – Present
Bright Technology Ventures

Designing and building AI-driven automation systems across business units. Combining full stack development with AI and workflow automation to streamline operations and create intelligent tools.

Full Stack Web Developer — Jun 2024 – Feb 2025
Bright Technology Ventures

Built and maintained web platforms and internal tools for multiple business units. Worked directly with management and commercial teams to decide what to build and how.

Technical Marketer — Jan – Jun 2024
Bright Technology Ventures

Worked on the intersection of marketing and tech. Website performance, tracking, data quality, GTM setup, and HubSpot configuration across business units.

Communication Specialist — 2019 – 2023
Kode Vastgoed

Joined when it was still small and helped grow it into a proper company. Did content, stakeholder communication, and marketing across multiple channels.

Intern — 2020 – 2021
Bluehub / Inventurinq (Venture Capital)

Helped explore new business opportunities within a VC firm. Did market research, tested business ideas, and helped with investment analysis for portfolio companies.

Intern — 2019 – 2020
e-Fulfilment Hub

Researched supply chain positioning and wrote strategic recommendations. Got hands-on experience with logistics and how things actually move.

EDUCATION

HBO ICT (part-time, starting) — Sep 2026
HAN University of Applied Sciences

Marketing & Communications (MBO Level 4) — 2018 – 2021
