Data & Infra
PostgreSQL, Redis, AWS (SES/SQS), Docker, Vercel

Practices
System Design, Data Modeling, AI/LLM Integration, Git, CI/CD

PROFILE

I'm a Full Stack Developer at Bright Technology Ventures, where I build and maintain web platforms and internal tools across multiple business units. I work closely with management and commercial teams to figure out what needs to be built and then actually build it. Before getting into development, I worked four years as a Communication Specialist at a real estate management company. That taught me to think about the business side too, not just the code.

EXPERIENCE

Full Stack Web Developer — Jun 2024 – Present
Bright Technology Ventures
Building and maintaining web platforms and internal tools for multiple business units. Working directly with management and commercial teams to decide what to build and how.

Technical Marketer — Jan – Jun 2024
Bright Technology Ventures
Worked on the intersection of marketing and tech. Website performance, tracking, data quality, GTM setup, and HubSpot configuration across business units.

Communication Specialist — 2019 – 2023
Kode Vastgoed
Joined when it was still small and helped grow it into a proper company. Did content, stakeholder communication, and marketing across multiple channels.

Intern — 2020 – 2021
Bluehub / Inventurinq (Venture Capital)
Helped explore new business opportunities within a VC firm. Did market research, tested business ideas, and helped with investment analysis for portfolio companies.

Intern — 2019 – 2020
e-Fulfilment Hub
Researched supply chain positioning and wrote strategic recommendations. Got hands-on experience with logistics and how things actually move.

EDUCATION

HBO ICT (part-time, starting) — Sep 2026
HAN University of Applied Sciences

Marketing & Communications (MBO Level 4) — 2018 – 2021
