Data & Infra
PostgreSQL, Redis, AWS (SES/SQS), Docker, Vercel

Practices
System Design, Data Modeling, AI/LLM Integration, Git, CI/CD

Giovanni Bagmeijer

Full Stack Developer

PROFILE

I'm a Full Stack Developer at Bright Technology Ventures, where I build and maintain web platforms and internal tools across multiple business units. I work closely with management and commercial teams to figure out what needs to be built and then actually build it. Before getting into development, I worked four years as a Communication Specialist at a real estate tech startup. That taught me to think about the business side too, not just the code.

EXPERIENCE

Full Stack Web Developer
Jun 2024 – Present

Bright Technology Ventures

Building and maintaining web platforms and internal tools for multiple business units. Working directly with management and commercial teams to decide what to build and how.

Technical Marketer
Jan – Jun 2024

Bright Technology Ventures

Worked on the intersection of marketing and tech. Website performance, tracking, data quality, GTM setup, and HubSpot configuration across business units.

Communication Specialist
2019 – 2023

Kode Vastgoed

Joined when it was still small and helped grow it into a proper company. Did content, stakeholder communication, and marketing across multiple channels.

Intern
2020 – 2021

Bluehub / Inventurinq (Venture Capital)

Helped explore new business opportunities within a VC firm. Did market research, tested business ideas, and helped with investment analysis for portfolio companies.

Intern
2019 – 2020

e-Fulfilment Hub

Researched supply chain positioning and wrote strategic recommendations. Got hands-on experience with logistics and how things actually move.

EDUCATION

Bachelor of Business Administration
HAN University of Applied Sciences
2018 – 2022
