Giovanni Bagmeijer

Full Stack Engineer

> I'm the one building the software at Bright Technology Ventures. Joined a year ago as a technical marketer, now own everything technical: platforms, internal tools, data pipelines. In that time I've single-handedly shipped a complete SaaS product with paying customers. I sit in on product and architecture decisions with management, but most of my time goes into writing code. Background in marketing and communications — I know what users actually need and I build it.

EXPERIENCE

Full Stack Web Developer
Jun 2024 – Present

Bright Technology Ventures

- Single-handedly built and shipped a full SaaS platform — 52+ API routes, 24 database models, payments via Mollie, email via AWS SES
- Multi-tenant setup: each customer only sees their own data, with role-based access control
- Fully automated payment flow: generate settlement → create PDF → send email → payment link → process webhook
- Security from day one: HMAC verification on webhooks, rate limiting on login and API, Sentry for monitoring
- Built a market intelligence tool in Python that collects, classifies, and surfaces competitive data
- Built an intranet application and knowledge bases for internal teams
- Involved in product and architecture decisions with management — from data model design to prioritization

Technical Marketer
Jan – Jun 2024

Bright Technology Ventures

- Managed and improved websites, tracking, and HubSpot across multiple business units
- Set up GTM implementation, maintained data quality, automated lead routing

Communication Specialist
2019 – 2023

Kode Vastgoed

- Four years growing with the company from startup to scale-up
- Content strategy, stakeholder communication, multi-channel campaigns

PROJECTS

Beyond Bricks
servicekosten.beyondbricks.nl

PRODUCTION SAAS · SOLE ENGINEER

Platform for Dutch property managers to handle service charges digitally: generate, send, collect. Live with paying customers, pay-per-use (€75 per settlement).

- Built everything myself: auth, data model, API, frontend, payments, email, PDF generation
- 52+ endpoints, 24 models, integrations with Mollie, AWS SES, Sentry
- Multi-tenant with strict per-account data isolation

Next.js 15 · TypeScript · Prisma 6 · PostgreSQL · Auth.js 5 · Mollie · AWS SES · Sentry

Sentinel

R&D · MARKET INTELLIGENCE

Tool that automatically pulls competitive intelligence from public sources, filters for relevance, and makes it actionable.

- Combines scrapers and LLM calls to separate noise from actual signals
- Model routing to keep LLM costs down — cheap model first, expensive only when needed
- Queue-based pipeline with retry logic, running on Docker + AWS SQS

Python · Docker · AWS SQS · LLM APIs · PostgreSQL
